RESEARCH PLAN

1. INTRODUCTION
Briefly summarize the background information for the proposed analysis. The types of data to which this proposal applies should also be included (e.g. dietary biomarkers, gene expression, metabolomics, microbiome, proteomics, etc.).

2. SPECIFIC AIMS
Identify the goals, hypotheses, and expected outcome(s), including the potential impact that the results will have for the TEDDY Study.

3. SIGNIFICANCE
Describe how the proposed project will improve scientific knowledge, technical capability, and/or clinical practice in diabetes research and beyond.

4. INNOVATION

Describe any novel theoretical concepts, approaches or methodologies, and/or instrumentation to be developed or used, as well as any advantage over existing methodologies, instrumentation or intervention(s).

5. APPROACH

Describe the analysis plan, overall methodology, and timelines for accomplishing the specific aims of the project. Identify potential complications, alternative strategies, and benchmarks for success anticipated to achieve the aims.

6. RELEVANT PRELIMINARY STUDIES

Discuss any relevant research experience and/or preliminary studies conducted by the proposed investigators that inform their contribution to the proposed analysis.

7. BIBLIOGRAPHY/REFERENCES CITED

List any references used to formulate your analysis plan and/or mentioned above in this proposal.
